CHALLENGER
YOUR PARTNER IN A MORE SECURE FUTURE

SMARTFORCE

WIRELESS INTRUDER AND SO MUCH MORE

Challenger are excited to introduce **SmartForce** to its extensive Security range.

At it's heart, the smart system is a state of the art, wireless intruder alarm with numerous additional security, surveillance and home automation options.

The SmartForce solution can operate as a stand alone security system or from the cloud with the added benefit of online management of all the devices, gateway and connected applications as well as delivering secure access, user authentication, alert notifications and account management.

Designed with installer in mind, its intuitive user operation and quick, trouble free installation deliver the ultimate smart home experience.

ALARM

Secure your family and home with instant notifications to your mobile or tablet when any event occurs, whether intruder, fire or flood, SmartForce has it covered

PLUG & PLAY AND WIRELESS

Easy installation with wireless devices and no tools needed. Wireless devices have up to 250m range with 2 way signals to avoid false alarms.

1 Connect the SMARTFORCE Hub

2 Login to your account

3 Put Batteries in your accessories

VIDEO SURVEILLANCE

Watch and monitor your home remotely with live HD video, playback footage and downloaded video clips. Videos are stored securely in the cloud and on to internal storage.

LIVE   PLAYBACK   DOWNLOAD

HOME AUTOMATION

Control & Dimming
Turn appliances on and off and adjust light brightness

Energy Saving
Monitor power consumption

Scenes & Scheduling
Start a series of actions automatically

Environment Monitor
Monitor the temperature, air quality and more

SMARTFORCE

UPGRADE FUNCTIONALITY

SmartForce is supplied with a generous, free of charge service package, which remains free for the life of the system. If additional services or storage are required, preset subscription packages are available, each offering varying degrees of functionality.

ONLINE TECHNICAL SUPPORT TOOLS

Challenger provides free telephone technical support, backed up through a comprehensive remote management dashboard allowing secure, real time viewing of user status and post event history enabling a quick and efficient response.

SECURE DATA

Rest assured all data stored in our two cloud servers in separate locations is secure with rigorous authentication protocols and the built in redundancy function ensures data is readily accessible at any time from either server.
