

Locking Types & Level Adjustment

Pull Safety Lock

Provides an easy solution for mounting and unmounting your TV securely to and from the wall.

Toolless Tilt Lock

Ensures effortless adjustment of your tilt wall mount to avoid glare and reflections.

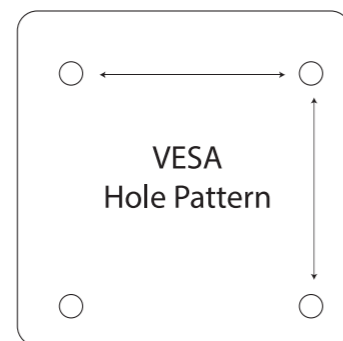

Level Adjustment

Allows you to adjust the level of the TV once it is on the wall.

How to measure your VESA

VESA Explained

- VESA is the standard adopted by most TV manufacturers for wall bracket mounting.
- There are 4 holes on the back of every flat screen TV and the space between the holes is governed by the VESA standard.
- VESA comes in a range of sizes depending on the weight and size of the flat screen TV; sizes 50 x 50mm, 75 x 75mm, 100 x 100mm, 200 x 100mm and so on... are standard. Not all flat screen TVs are compliant, contact the TV manufacturer for assistance if your TV does not appear to comply with VESA.
- To check if your TV or monitor is compliant, look at the rear of the display there should be 4 screw-holes in a square pattern or in larger displays a rectangular shape.
- Measure the distances between the holes in mm to find your VESA format.
