### WHAT'S IN THE BOX?

- 5265 Thermostat
- Fixing screws
- Installation guide
- Fixing Plate
- Sensor Probe
- Conduit kit (with mat)

**THERMOSTAT LOCATION**

The thermostat should be located within the room to be heated, subject to current electrical regulations relating to bathrooms and wet areas. As the thermostat is floor sensing it can be installed out-side the room or in a cupboard if necessary.

For easy operation and access to controls choose a location about 1.3m above the floor.

Should a remote location for the thermostat be necessary the system wiring can be extended up to 50m from the installation. Suitable extension wire is available from Thermogroup UK if required.

**LARGE AREAS OVER 15A**

For areas exceeding 15 AMPS that require control by a single thermostat, a snubber/contactor must be used.

Snubbers/contactors are available in our electrical accessories range.

**Simple installation and wiring process**

**Bright LED backlit display**

The 5265 features a bright LED backlit display that looks great in any room. The backlight allows you to adjust your thermostat at night. The two doors close to hide all of the buttons and icons for a clean finish.

**Technical Data**

|               |                 |
